

PART I: Write true if the statement is correct and false if it is not correct and give your answers on the separate answer sheet. (1pt each)

1. After conditioning natural stimulus becomes learned stimulus.
2. Character refers to enduring features with which each person is born.
3. A story how you met your dorm mate is categorized as episodic memory.
4. Learning periods need to be extended to ensure maximum retention of information.
5. Sense of inadequacy is a symptom of histrionic personality disorder.
6. Intrinsic motivation will disappear when incentives are removed.
7. Social Learning theory may not emphasize the role of reinforcement.
8. Specific phobia involves fear of interacting with others.

Part II. Match the expressions under column 'A' with their respective Ego defence mechanisms under column 'B' and put your answers on the separate answer sheet provided (1pt each).

- | A | B |
|--|-----------------------|
| 9. Giving plausible reason | A. Repression |
| 10. Displaying childish behaviour | B. Displacement |
| 11. Believing the opposite | C. Reaction formation |
| 12. Taking anger out on innocent parties | D. Regression |
| 13. Hiding traumatic event | E. Sublimation |
| | F. Rationalization |
| | G. Projection |

Part III: Choose the best answer from the given alternatives for the following multiple choices questions and write your answers on the separate answer sheet provided (1pt each).

14. Which of the following statements is **TRUE** about learning?
 - A. Learning is innate
 - B. Learning involves acquiring new information and skills.
 - C. Learning is always a positive experience.
 - D. Learning can be temporary or permanent.
15. A student practices playing the piano for several months and becomes proficient. This situation demonstrates which aspect of learning?
 - A. The relatively permanent change in behavior that occurs through learning.
 - B. The role of feedback and evaluation in assessing learning progress.
 - C. The importance of motivation and perseverance in the learning process.
 - D. The influence of social interaction and collaboration on learning outcomes.

ART 1: True-False Items (1 pt. each)

Direction: Write "True" if the statement is correct and "False" if otherwise on the answer sheet.

1. Serial position effect states that if you are shown a list of items and then asked immediately about them; your retention of any particular item will depend on its position on the list.
2. The access of information from short term memory is immediate but the access of information from long term memory requires time and effort.
3. Persistence as an element of motivation is expressed as an individual's choice when presented with a number of possible alternatives.
4. People are unlikely to change a behavior or do something different unless they are motivated to do so.
5. One of the characteristics of learning, learning is an organization of experience states that it leads to a change in the mental structure of the learner after every experience.
6. The principle of intensity in learning implies that a student can learn equally from the original stimulus or from a substitute.

PART 2: Matching Items (1 pt. each)

Direction: Match the various explanations listed under column "A" with the most appropriate principle of motivation in column "B" and write the letter of your choice on the answer sheet in capital letters.

Column A

Column B

- | | |
|--|-------------------|
| 1. Beza is able to do a lot of things because she enjoys excitement and action | A. Humanistic |
| 2. Melat respects older people very much because by doing that she is getting social approval from the society she is in | B. Instinctive |
| 3. Abebe regularly exercises because by doing that he decreases his tension and pain and regains satisfactory situation | C. Psychoanalytic |
| 4. Girma aggresses on others because that is how he is predetermined to act by nature | D. Cognitive |
| | E. Behaviorist |
| | F. Humanistic |

PART 3: Multiple Choice Items (1 pt. each)

Direction: Choose the best answer from the given alternatives and write the letter of your choice on the answer sheet.

1. Which one of the following opportunity does not satisfy self-actualization?
A. participation in decision making
B. creative and challenging job
C. job flexibility
D. job security

f experience states that there is a

urn equally from the real thing and

A" with the most suitable theory
on the answer sheet. Use only

Column B

t and A. Humanistic theory

she is B. Instinct theory

his C. Psychoanalytic theory

mined D. Arousal theory

E. Incentive theory

F. Drive reduction theory

rnatives and write your answer on the

self-actualization?
ibility and autonomy

19. Changes resulted from illness and intoxication cannot be considered as learning. This concept us that:

- A. Learning is a change in knowledge or behavior
- B. Learning depends on experience or practice
- C. Learning is an internal mental activity
- D. Learning is a process

20. Any consequence of behavior that strengthens responses or behavior by providing pleasant stimulus is:

- A. negative reinforcement
- B. positive punishment
- C. positive reinforcement
- D. negative punishment

21. Continuing playing football betting because of the fact that one has sparingly won some money (previously) by doing so

- A. positive punishment
- B. continuous reinforcement
- C. partial reinforcement
- D. negative punishment

22. Rihana and Wintana are University lecturers. They are intimate friends. They usually debate on some issues, such as on meaning or interpretation of democracy, violence against women, and religion. In such debate one tries to persuade the other by listing out the possible reasons. Which one of the following types of long-term memory is most likely to be used in the debate?

- A. semantic memory
- B. procedural memory
- C. episodic memory
- D. immediate memory

23. What type of learning does the use of umbrella to protect oneself from rain represent?

- A. positive reinforcement
- B. positive punishment
- C. negative reinforcement
- D. negative punishment

24. The wrong statement about learning is:

- A. Learning is a relatively permanent change in behavior
- B. Learning requires active reorganization of experience
- C. The input for learning comes from the environment
- D. Being physically ready to make sex is learning

25. When an extinguished behavior suddenly reappears on its own, with no retraining, the process is called _____

- A. extinction
- B. generalization
- C. spontaneous recovery
- D. discrimination

8. Which of the following is not an example of negative reinforcement?
 - A. Cleaning the house to get rid of your mother's nagging
 - B. Studying for an exam to avoid getting a poor grade
 - C. Taking aspirin to relieve headache
 - D. Studying hard to get good result
9. Which one of the following memory types has unlimited capacity and unlimited period of time to retain information?
 - A. sensory Memory
 - B. long term memory
 - C. working Memory
 - D. sensory receptors
10. Assume, you are walking down a dark road late at night. You hear footsteps behind you and you begin to tremble, your heart beats faster, and your breathing deepens. At the same time as these physiological changes occur you also experience the emotion of fear. This particular example belongs to _____ theory of emotion.
 - A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
11. Which one of the following types of schedule of reinforcement is characterized by high rate of response and resistance to extinction?
 - A. variable interval schedule
 - B. variable ratio schedule
 - C. fixed interval schedule
 - D. fixed ratio schedule
12. Escaping penalty by paying Iqub fees on time is a best example of _____.
 - A. positive reinforcement
 - B. negative reinforcement
 - C. positive punishment
 - D. negative punishment
13. Assume, you are walking down a dark road late at night. You hear footsteps behind you and you think it may be a robber so you begin to tremble, your heart beats faster, and your breathing deepens and at the same time you experience fear. This particular example belongs to _____ theory of emotion.
 - A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
14. The second step in social learning theory is _____.
 - A. motivation
 - B. retention
 - C. production
 - D. attention
15. In the categories of long term memory the memory about one's own life is _____.
 - A. episodic
 - B. semantic
 - C. procedural
 - D. working
16. In the classical conditioning theory, the response during conditioning is _____.
 - A. neutral
 - B. learned
 - C. conditioned
 - D. unconditioned
17. In the principle of extinction of classical conditioning theory the cause for the disappearance of conditioned response is the absence of _____ for a long time.
 - A. unconditioned stimulus
 - B. conditioned response
 - C. conditioned stimulus
 - D. unconditioned response
18. Mistaking the sound of an ambulance in the city for the sound of police cars and going home to escape since he committed a crime the other day is an example of _____.
 - A. stimulus discrimination
 - B. stimulus generalization
 - C. spontaneous recovery
 - D. extinction

2. Suppose, you are walking down a dark road late at night. You hear footsteps behind you and begin to tremble, your heart beats faster, and your breathing deepens. You notice these physiological changes, and interpret them as your body's preparation for a fearful situation. You then experience fear. This example belongs to _____ theory of emotion.
- A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
3. Assume that you have heard one of your favorite music with your girlfriend about two years ago. Currently, whenever you listen such music, you remember her. This is mainly because of _____
- A. classical conditioning
 - B. observational learning
 - C. operant conditioning
 - D. the interference effect
4. Identify correct statement about classical conditioning.
- A. In classical conditioning, two stimuli are associated to each other.
 - B. Once conditioned stimulus is learned, it will never be extinguished.
 - C. There is complete extinction.
 - D. Other similar stimuli to the conditioned stimulus can never generate conditioned response.
5. The similarity between classical conditioning and operant conditioning is that:
- A. Both depend on association of stimulus and response
 - B. Both depend on involuntary behavior (reflex action)
 - C. Both focus on reinforcement and punishment
 - D. Both of them are based on voluntary behavior
6. Any consequence of behavior that discourages responses or behavior by providing unpleasant stimulus is:
- A. positive reinforcement
 - B. positive punishment
 - C. negative Reinforcement
 - D. negative Punishment
7. Assume, you are walking down a dark road late at night. You hear footsteps behind you and begin to tremble, your heart beats faster, and your breathing deepens. Upon noticing this and realize that it comes from the fact that you are walking down a dark road by yourself. This is dangerous and therefore you feel the emotion of fear. This particular example belongs to _____ theory of emotion.
- A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory

26. During a laboratory experiment, a researcher sounds a ring and the dogs in the laboratory reacted to the sound. However, a particular dog, which is a new comer in the laboratory, did not react. Based on this information, you can say that the ring is a(n) _____ stimulus for the new comer dog.
- A. conditioned
 - B. unconditioned
 - C. neutral
 - D. generalized
27. Regassa went on a boat trip with friends on Lake Hawasa and he gets nauseated and vomited on the trip. The next day Regassa gets nauseated when he sees a boat on the shore. The boat might have become a(n) _____ for Regassa.
- A. unconditioned response
 - B. unconditioned stimulus
 - C. conditioned response
 - D. conditioned stimulus
28. Chaltu recently received a phone call with the very sad news that her father had died. Now ever time the phone rings, Chaltu feels fearful and sad. In this example, the "news that her father died" served as the _____.
- A. unconditioned stimulus
 - B. conditioned response
 - C. conditioned stimulus
 - D. unconditioned response
29. If you work a job where you get paid a salary every 2 weeks, you are reinforced on a _____ schedule.
- A. variable-ratio
 - B. fixed-interval
 - C. variable-interval
 - D. fixed-ratio
30. When little Gemechu asks a question in kindergarten, his teacher smiles for him. For Gemechu, the teacher's smiling serves as a _____.
- A. neutral stimulus
 - B. negative reinforcer
 - C. Positive reinforcer
 - D. punisher
31. Disasa quickly learned how to change a tire. His knowledge remained dormant until he had a flat tire and had to change the tire. This illustrates the concept of: _____.
- A. latent learning
 - B. observational learning
 - C. classical conditioning
 - D. associative learning
32. A salesman gets paid according to the number of items he sells. This is a _____ schedule.
- A. variable-ratio
 - B. fixed-interval
 - C. fixed-ratio
 - D. variable-interval
33. As B. F. Skinner is to _____, Albert Bandura is to _____.
- A. operant conditioning; observational learning
 - B. operant conditioning; classical conditioning
 - C. classical conditioning; respondent conditioning
 - D. classical conditioning; observational learning

34. Ahmed has recently changed his phone number. Now he often finds himself writing his old number when he fills out forms. This is best explained by:
- A. decay
 - B. proactive interference
 - C. retroactive interference
 - D. cue-dependent forgetting
35. Lidya is at a party with her friend, where she is introduced to many of her friend's family members. Each time she is introduced to someone new, she repeats the name as frequently as she can. These new names most likely reside in which part of Lidya's memory?
- A. Sensory
 - B. short-term
 - C. long-term
 - D. iconic
36. Which of the following ways of advertisements would represent an attempt to classically condition consumers to have positive feelings for a product?
- A. Telling consumers how pleased they will be if they buy the product.
 - B. Describing in great detail why the product is better than other products.
 - C. Promising consumers a reward (such as a rebate) if they buy the product.
 - D. Showing the product with something else that already elicits positive feelings.
37. Money has been sent to you through the bank, and you silently repeat the secret code until you are called to the counter. This phenomenon is best explained by:
- A. elaborative rehearsal
 - B. maintenance rehearsal
 - C. memory span
 - D. chunking
38. Getting information into memory is called _____ while getting information out of memory is called _____.
- A. encoding, decoding
 - B. storage, retrieval
 - C. encoding, retrieval
 - D. storage, encoding
39. A student who was very anxious about his class presentation forgot about it and missed class on the day of the presentation. Which theory best explains the student's forgetting?
- A. motivated forgetting
 - B. decay
 - C. interference
 - D. encoding failure
40. If Hilina has been a bad girl and as a result is not allowed to watch her favorite television show, parents are using:
- A. positive reinforcement
 - B. negative reinforcement
 - C. positive punishment
 - D. negative punishment
41. Which one of the following type of motivation is related to the biological make-up of the organism?
- A. intrinsic
 - B. primary
 - C. extrinsic
 - D. secondary

27. Sara was raped by her close relative when she was 13. However, due to the negative cultural connotation, she did not tell the issue to anyone. She forgets what was happened to her and consider herself as a virgin till now. Which theory explains this type of forgetting?
 A. Decay B. Cue dependent C. Displacement D. Motivated forgetting

Part II: Completion items: Instruction: After Reading the Following Questions Carefully, Fill in the Blank Spaces with the Correct Words or Phrases. Write your Answers on the Space provided on the Answer Sheet (1 Point Each).

28. According to classical conditioning, reappearance of a conditioned response refers to _____
 29. A mechanism in which bits of information are combined into meaningful units so that more information can be held in short term memory is known as _____
 30. The "ability to know events" without any sensory contact is known as _____

Answer Sheet

Name: _____

Part I: Multiple Choice Items

1. <u>D</u>	7. <u>A</u>	13. <u>B</u>	19. <u>A</u>	25. <u>C</u>
2. <u>A</u>	8. <u>B</u>	14. <u>D</u>	20. <u>C</u>	26. <u>A</u>
3. <u>C</u>	9. <u>D</u>	15. <u>A</u>	21. <u>D</u>	27. <u>D</u>
4. <u>C</u>	10. <u>A</u>	16. <u>B</u>	22. <u>B</u>	
5. <u>B</u>	11. <u>C</u>	17. <u>C</u>	23. <u>A</u>	
6. <u>D</u>	12. <u>B</u>	18. <u>D</u>	24. <u>D</u>	

Part II: Completion Items

28. Spontaneous recovery
 29. Chunking
 30. Para-normal ability

For the Instructor's Use Only!

Multiple Choice Items (27%)	Completion Items (3%)	Total: 30%

The End

15. According to Albert Bandura, learned behaviors are transformed into performance at the phase of ____.
16. Shiluka read a list of 30 vocabulary words only once. If he is typical and shows the serial position effect, we would expect that the words he remembers two days later are ____.
17. A professional who applies psychological principles to improve the legal system is a/an ____ psychologist.
18. Which one of the following terms are best associated with their meanings?
19. Which of the following best summarizes the humanistic approach?
20. Abel a grade 6th student, his academic result decreases from time to time because of his time management skill problem. To ameliorate this problem a psychologist plans to apply home based behavioral modification technique with the help family members. One strategy to enhance Abel's studying habit was eliminating responsibilities that Abel does not want to do such as cleaning the house after he engage on studying. In this case which technique was implemented by the psychologist to enhance Abel's time management skill?
21. According to Gestalt principle of perceptual organization, people tend to group objects together due to their closeness. This is the principle of:
22. In the few days of each New Year, many of us continue to write the date using the Old Year instead of the New Year. This is primarily due to ____.
23. In the after-conditioning phase of Pavlov's experiment, the dog's salivation is ____.
24. Consider the following hypothesis: "Exposure to corporal punishment is more likely to lead to aggression." In this hypothesis, aggression is the ____, and exposure to corporal punishment is the ____ respectively.
25. Limat tried to unscramble the letters GYLOPYHCOS for 20 minutes to spell a word, but she was not successful. While she walking to class, the answer suddenly came to her that the word was PSYCHOLOGY. This exemplifies ____.
26. A woman preparing Doro Wot (a special Ethiopian dish) is not as sensitive to the smell of the Doro Wot as a stranger walking by near her house. Her insensitivity can best be explained by the concept of ____.

22. A child observes his parent exhibiting helpful behavior towards others. He later demonstrates similar behavior towards his classmates. What aspect of Social Learning theory does this scenario highlight?

- A. The importance of positive reinforcement in shaping behavior
- B. The role of attention and retention in observational learning
- C. The influence of modeling on acquiring new behaviors and attitudes
- D. The concept of reciprocal determinism in social interactions

23. According to cognitive learning theory, what is the primary focus of learning?

- A. Observable changes in behavior
- B. The internal mental processes involved in learning
- C. The role of emotions and motivation in shaping learning outcomes
- D. The influence of social interaction and collaboration on learning

24. Which scenario best illustrates the concept of classical conditioning?

- A. A child learns to solve math problems through repeated practice
- B. A dog learns to sit on command after being given a reward each time it obeys.
- C. A person feels fearful once experienced a traumatic event.
- D. A student feels motivated to study after receiving praise

25. Tewabech is a manager who wants to improve employee productivity in her department. She decides to implement a reinforcement system where employees receive a bonus for every 10 completed tasks. Which reinforcement schedule is Tewabech using?

- A. Fixed-ratio schedule
- B. Variable-ratio schedule
- C. Fixed-interval schedule
- D. Variable-interval schedule

26. Which of the following is an example of negative reinforcement?

- A. Giving a reward for completing a task.
- B. Removing an aversive stimulus to increase the likelihood of behaviour.
- C. Providing praise for good behavior.
- D. Introducing a pleasant stimulus to encourage a behavior.

27. Which of the following best describes insight learning?

- A. Learning that occurs through reinforcement of specific behaviours.
- B. Sudden understanding or solution to a problem without prior trial-and-error
- C. Learning that occurs without conscious awareness or attention
- D. Behaviour changes that are immediately evident in response to stimuli

28. Mr. Tesema has the information related to bicycle riding, folding a laundry and climbing a tree, in which memory the information has been stored?
- A. Semantic memory
 - B. Episodic memory
 - ~~C. Procedural memory~~
 - D. Explicitly memory
29. According to trait theory, which of the following dimensions describes an individual's tendency to be organized, responsible, and self-disciplined?
- A. Extraversion
 - B. Conscientiousness
 - C. Agreeableness
 - D. Openness
30. Carl Rogers emphasized that a positive self-concept is promoted by _____
- A. Unconditional positive regard
 - ~~C. Self-actualization~~
 - B. Sense of control
 - D. Positive regard
31. Saba meets someone whose name is Ali at certain place; fortunately his name is identical with her brother's name. So, she can easily remember the name of this person by making an association; such types of memorization involves through _____
- A. Implicit memory
 - ~~B. Chunking~~
 - C. Maintenance rehearsal
 - D. Elaborative rehearsal
32. While walking down the street, Dr. Ayele bumped into one of his former students. He knew he had taught this particular student for three years at university, but he could not remember the student's name. Mr. Ayele's inability to recall the student's name is most likely due to:
- ~~A. Proactive interference~~
 - C. Retrieval failure
 - B. Retroactive interference
 - D. Motivated forgetting
33. The tendency to recall the last items in a sequence more readily than those in the middle of the sequence is called?
- A. Recency Effect
 - C. Retrieval
 - B. Primacy Effect
 - D. Recognition
34. Which kind of forgetting is involved when the mathematics I studied yesterday makes it more difficult to learn and remember the physics I am studying today?
- A. Decay
 - C. Retroactive interference
 - ~~B. Proactive interference~~
 - D. Retrieval failure
35. Which of the following is NOT a way to improve memory?
- ~~E. Increasing interference~~
 - A. Paying attention
 - D. Over learning
 - B. Adding meaning

16. Which of the following is NOT a characteristic of learning?
- A. Learning is always a linear process.
 - B. Learning can be influenced by a person's prior experiences.
 - C. Learning can be motivated by internal and external factors.
 - D. Learning can involve both conscious and unconscious processes.
17. Which statement best describes the relationship between learning and behavior?
- A. Learning always leads to a change in behavior.
 - B. A change in behavior always guarantees learning has occurred.
 - C. Observing a change in behavior is the only way to assess learning.
 - D. Learning can occur without a noticeable change in behavior.
18. Which of the following is an example of stimulus generalization in classical conditioning?
- A. A child fears all birds after being scared by a rabbit.
 - B. A dog salivates to the sound of a bell but not to a whistle.
 - C. A man gets anxious in all crowded places after a bad experience in a mall.
 - D. A cat only responds to its owner's voice and ignores other voices.
19. In Pavlov's experiment, which of the following pairings would be the most effective in establishing a conditioned response?
- A. A loud buzzer immediately followed by food presentation.
 - B. A soft tone presented several seconds before food arrives.
 - C. A flashing light presented repeatedly without food following.
 - D. The sight of an empty food bowl followed by food presentation.
20. In a continuous reinforcement schedule, the desired behaviour is reinforced:
- A. After a fixed number of responses
 - ~~A.~~ Every time it occurs
 - B. After a varying number of responses
 - C. After a fixed amount of time
21. A group of friends witness another friend being praised by their teacher for completing a challenging assignment. Later, they are observed putting in extra effort on their own assignments. What concept from Social Learning Theory best explains this behavior?
- A. Direct reinforcement
 - C. Operant conditioning
 - B. Observational learning
 - ~~B.~~ Vicarious reinforcement

44. Which psychological perspective emphasizes the role of unconscious conflicts between biological urges and societal moral standards in the development of abnormal behavior?
- A. Cognitive perspective
 - B. Learning perspective
 - C. Biological perspective
 - D. Psychoanalytic perspective
45. Which of the following represents the correct order of Maslow's hierarchy of needs, starting from the most basic to the highest level?
- A. Esteem, Safety, Physiological, Love/Belonging, Self-Actualization
 - B. Physiological, Safety, Love/Belonging, Esteem, Self-Actualization
 - C. Safety, Physiological, Love/Belonging, Esteem, Self-Actualization
 - D. Physiological, Esteem, Safety, Love/Belonging, Self-Actualization

Part IV: Short Answer; write your answers on the separate answer sheet provided

1. List four types of conflict of motives (2pts)
2. Write the three treatment techniques of psychological disorders (1.5pts)
3. Define personality (1.5pts)

36. Subjective feeling of anxiety as a criteria of psychological disorder denotes:

- A. Abnormality B. Maladaptive-ness C. Dangerousness D. Personal distress

37. Which type of memory allows you to recall the details of your last year birthday party?

- A. Episodic memory
B. Working memory
C. Sensory memory
D. Procedural memory

38. A freshman student who came from Northern Ethiopia shows nightmares and flashbacks of the war time conditions. Which type of disorder the student is experiencing?

- A. Agoraphobia
~~B. Posttraumatic stress disorder~~ C. Obsessive-compulsive
D. Personality disorder

39. Mr. Gemechu is experiencing a series of symptoms fear of going to public places. He generally avoids being in this places because he is worried about his ability to escape. He is likely suffering from

- A. Panic disorder
B. Agoraphobia
C. Social phobia
D. Post-traumatic stress disorder

40. Among the following given alternatives, one is NOT the cognitive explanation for the occurrence of psychological disorder?

- A. The irrational thinking we hold about some things
B. The self-defeating negative thoughts in our mind
~~C. The inadequate learning from the social environment~~
D. The irrational beliefs we hold about some things

41. Sara has always been cautious and distrustful of others. She constantly suspects that her friends and co-workers are talking behind her back and plotting against her, even when there is no evidence to support these beliefs. Sarah's behavior is most indicative of which personality disorder?

- A. Schizoid
B. Narcissistic
C. Histrionic
~~D. Paranoid~~

42. Which personality disorder is characterized by excessive emotional behavior and a constant need for attention?

- ~~A. Histrionic~~
B. Schizotypal
C. Obsessive-Compulsive
D. Paranoid

43. Which of the following type of mood disorder is characterized by less swing in mood?

- ~~A. Cyclothymia~~
B. Dysthymia
C. Bipolar disorder
D. Major depression

26. During a laboratory experiment, a researcher sounds a ring and the dogs in the laboratory reacted to the sound. However, a particular dog, which is a new comer in the laboratory, did not react. Based on this information, you can say that the ring is a(n) _____ stimulus for the new comer dog.
- A. conditioned
 - B. unconditioned
 - C. neutral
 - D. generalized
27. Regassa went on a boat trip with friends on Lake Hawasa and he gets nauseated and vomited on the trip. The next day Regassa gets nauseated when he sees a boat on the shore. The boat might have become a(n) _____ for Regassa.
- A. unconditioned response
 - B. unconditioned stimulus
 - C. conditioned response
 - D. conditioned stimulus
28. Chaltu recently received a phone call with the very sad news that her father had died. Now ever time the phone rings, Chaltu feels fearful and sad. In this example, the "news that her father died" served as the _____.
- A. unconditioned stimulus
 - B. conditioned response
 - C. conditioned stimulus
 - D. unconditioned response
29. If you work a job where you get paid a salary every 2 weeks, you are reinforced on a _____ schedule.
- A. variable-ratio
 - B. fixed-interval
 - C. variable-interval
 - D. fixed-ratio
30. When little Gemechu asks a question in kindergarten, his teacher smiles for him. For Gemechu, the teacher's smiling serves as a _____.
- A. neutral stimulus
 - B. negative reinforcer
 - C. Positive reinforcer
 - D. punisher
31. Disasa quickly learned how to change a tire. His knowledge remained dormant until the flat tire and had to change the tire. This illustrates the concept of: _____.
- A. latent learning
 - B. observational learning
 - C. classical conditioning
 - D. associative learning
32. A salesman gets paid according to the number of items he sells. This is a _____ schedule.
- A. variable-ratio
 - B. fixed-interval
 - C. fixed-ratio
 - D. variable-interval
33. As B. F. Skinner is to _____, Albert Bandura is to _____.
- A. operant conditioning; observational learning
 - B. operant conditioning; classical conditioning
 - C. classical conditioning; respondent conditioning
 - D. classical conditioning; observational learning

19. Changes resulted from illness and intoxication cannot be considered as learning. This concept us that:

- A. Learning is a change in knowledge or behavior
- B. Learning depends on experience or practice
- C. Learning is an internal mental activity
- D. Learning is a process

20. Any consequence of behavior that strengthens responses or behavior by providing pleasant stimulus is:

- A. negative reinforcement
- B. positive punishment
- C. positive reinforcement
- D. negative punishment

21. Continuing playing football betting because of the fact that one has sparingly won some money (previously) by doing so

- A. positive punishment
- B. continuous reinforcement
- C. partial reinforcement
- D. negative punishment

22. Rihana and Wintana are University lecturers. They are intimate friends. They usually debate on some issues, such as on meaning or interpretation of democracy, violence against women, and religion. In such debate one tries to persuade the other by listing out the possible reasons. Which one of the following types of long-term memory is most likely to be used in the debate?

- A. semantic memory
- B. procedural memory
- C. episodic memory
- D. immediate memory

23. What type of learning does the use of umbrella to protect oneself from rain represent?

- A. positive reinforcement
- B. positive punishment
- C. negative reinforcement
- D. negative punishment

24. The wrong statement about learning is:

- A. Learning is a relatively permanent change in behavior
- B. Learning requires active reorganization of experience
- C. The input for learning comes from the environment
- D. Being physically ready to make sex is learning

25. When an extinguished behavior suddenly reappears on its own, with no retraining, the process is called _____

- A. extinction
- B. generalization
- C. spontaneous recovery
- D. discrimination

8. Which of the following is not an example of negative reinforcement?
 - A. Cleaning the house to get rid of your mother's nagging
 - B. Studying for an exam to avoid getting a poor grade
 - C. Taking aspirin to relieve headache
 - D. Studying hard to get good result
9. Which one of the following memory types has unlimited capacity and unlimited period of time to retain information?
 - A. sensory Memory
 - B. long term memory
 - C. working Memory
 - D. sensory receptors
10. Assume, you are walking down a dark road late at night. You hear footsteps behind you and you begin to tremble, your heart beats faster, and your breathing deepens. At the same time as these physiological changes occur you also experience the emotion of fear. This particular example belongs to _____ theory of emotion.
 - A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
11. Which one of the following types of schedule of reinforcement is characterized by high rate of response and resistance to extinction?
 - A. variable interval schedule
 - B. variable ratio schedule
 - C. fixed interval schedule
 - D. fixed ratio schedule
12. Escaping penalty by paying Iqub fees on time is a best example of _____.
 - A. positive reinforcement
 - B. negative reinforcement
 - C. positive punishment
 - D. negative punishment
13. Assume, you are walking down a dark road late at night. You hear footsteps behind you and you think it may be a robber so you begin to tremble, your heart beats faster, and your breathing deepens and at the same time you experience fear. This particular example belongs to _____ theory of emotion.
 - A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
14. The second step in social learning theory is _____.
 - A. motivation
 - B. retention
 - C. production
 - D. attention
15. In the categories of long term memory the memory about one's own life is _____.
 - A. episodic
 - B. semantic
 - C. procedural
 - D. working
16. In the classical conditioning theory, the response during conditioning is _____.
 - A. neutral
 - B. learned
 - C. conditioned
 - D. unconditioned
17. In the principle of extinction of classical conditioning theory the cause for the disappearance of conditioned response is the absence of _____ for a long time.
 - A. unconditioned stimulus
 - B. conditioned response
 - C. conditioned stimulus
 - D. unconditioned response
18. Mistaking the sound of an ambulance in the city for the sound of police cars and going home to escape since he committed a crime the other day is an example of _____.
 - A. stimulus discrimination
 - B. stimulus generalization
 - C. spontaneous recovery
 - D. extinction

34. Ahmed has recently changed his phone number. Now he often finds himself writing his old number when he fills out forms. This is best explained by:
- A. decay
 - B. proactive interference
 - C. retroactive interference
 - D. cue-dependent forgetting
35. Lidya is at a party with her friend, where she is introduced to many of her friend's family members. Each time she is introduced to someone new, she repeats the name as frequently as she can. These new names most likely reside in which part of Lidya's memory?
- A. Sensory
 - B. short-term
 - C. long-term
 - D. iconic
36. Which of the following ways of advertisements would represent an attempt to classically condition consumers to have positive feelings for a product?
- A. Telling consumers how pleased they will be if they buy the product.
 - B. Describing in great detail why the product is better than other products.
 - C. Promising consumers a reward (such as a rebate) if they buy the product.
 - D. Showing the product with something else that already elicits positive feelings.
37. Money has been sent to you through the bank, and you silently repeat the secret code until you are called to the counter. This phenomenon is best explained by:
- A. elaborative rehearsal
 - B. maintenance rehearsal
 - C. memory span
 - D. chunking
38. Getting information into memory is called _____ while getting information out of memory is called _____.
- A. encoding, decoding
 - B. storage, retrieval
 - C. encoding, retrieval
 - D. storage, encoding
39. A student who was very anxious about his class presentation forgot about it and missed class on the day of the presentation. Which theory best explains the student's forgetting?
- A. motivated forgetting
 - B. decay
 - C. interference
 - D. encoding failure
40. If Hilina has been a bad girl and as a result is not allowed to watch her favorite television show, parents are using:
- A. positive reinforcement
 - B. negative reinforcement
 - C. positive punishment
 - D. negative punishment
41. Which one of the following type of motivation is related to the biological make-up of the organism?
- A. intrinsic
 - B. primary
 - C. extrinsic
 - D. secondary

Assume, you are walking down a dark road late at night. You hear footsteps behind you and you begin to tremble, your heart beats faster, and your breathing deepens. At the same time as these physiological changes occur you also experience the emotion of fear. This particular example belongs to _____ theory of emotion.

- A. Cannon-Bard theory
- B. James-Lang theory

36) Escaping penalty by paying "iqub" fees on time is a best example of _____

- A. positive reinforcement
- B. negative reinforcement

37) Assume, you are walking down a dark road late at night. You hear footsteps behind you and you think it may be a robber so you begin to tremble, your heart beats faster, and your breathing deepens and at the same time you experience fear. This particular example belongs to _____ theory of emotion.

- A. Cannon-Bard theory
- B. James-Lang theory
- C. Schachter-Singer theory
- D. Lazarus theory

38) The first step in social learning theory is _____

- A. motivation
- B. retention
- C. production
- D. attention

39) In the categories of long-term memory, the memory about one's own life is _____ memory

- A. episodic
- B. semantic
- C. procedural
- D. working

40) Mistaking the sound of an ambulance in the city for the sound of police cars and going out from home to escape since he committed a crime the other day is an example of _____

- A. stimulus discrimination
- B. stimulus generalization
- C. spontaneous recovery
- D. extinction

41) Continuing playing football betting because of the fact that one has sparingly won some money (previously) by doing so

- A. positive punishment
- B. continuous reinforcement

- C. partial reinforcement
- D. negative punishment

42) Aberu and Fikir are University lecturers. They are intimate friends. They usually debate on some issues, such as on meaning or interpretation of democracy, violence against women, and religion. In such debate one tries to persuade the other by listing out the possible reasons. Which one of the following types of long-term memory is most likely to be used in the debate?

- A. semantic memory
- B. procedural memory
- C. episodic memory
- D. immediate memory

43) When an extinguished behaviour suddenly reappears on its own, with no retraining, the process is called _____

- A. extinction
- B. generalization
- C. spontaneous recovery
- D. discrimination

44) Disasa quickly learned how to change a tire. This illustrates the concept of _____

- A. extinction
- B. generalization
- C. trace learning
- D. associative learning

flat tire and had to change the tire.

- A. latent learning
- B. insight learning

25) A bakery gives customers a free pastry after every 6 pastry purchases. This is an example of what kind of reinforcement schedule?

- A. fixed interval B. fixed ratio C. variable interval D. variable ratio

26) Insight learning is a cognitive process whereby

- A. It depends on conditioning of particular behaviours for its occurrence

B. we solve a problem by focusing only on one aspect of the problem

C. we reorganize our perception of a problem

- D. All

27) An intermittent schedule of reinforcement that reinforces behaviour after an average, but unpredictable, amount of time has passed is called a _____ schedule.

- A. fixed ratio B. variable ratio C. fixed interval D. variable interval

28) Food is to _____ reinforcer as money is to _____ reinforcer.

- A. positive, negative C. primary, secondary
B. negative, positive D. secondary, primary

29) After being bitten by a big Alsatian dog, Hugo was scared of other big dogs but he was not scared of little dogs like Chihuahuas. This pattern demonstrates:

- A. shaping B. negative punishment C. discrimination D. latent learning

30) You are online one evening when an advert appears showing your favourite movie star wearing a new brand of sunglasses. The advertiser hopes that your positive feelings toward the movie star will make you want the sunglasses. In this situation, the sunglasses would be the:

- A. US B. UR C. CS D. CR

31) People who have a lot of dental problems often come to dislike even the smell of their dentist's office. The smell represents a(n):

- A. US B. UR C. CS D. CR

32) Taking away a person's car after they have been caught for exceeding the speed limit would be an example of:

- A. positive punishment C. positive reinforcement
B. negative punishment D. negative reinforcement

33) Suppose, you are walking down a dark road late at night. You hear footsteps behind you and you begin to tremble, your heart beats faster, and your breathing deepens. You notice these physiological changes, and interpret them as your body's preparation for a fearful situation. You then experience fear. This example belongs to _____ theory of emotion.

- A. Cannon-Bard theory

B. James-Lang theory

C. Schachter-Singer theory

D. Lazarus theory

34) Assume, you are walking down a dark road late at night. You hear footsteps behind you and you begin to tremble, your heart beats faster, and your breathing deepens. Upon noticing this arousal you realize that it comes from the fact that you are walking down a dark road by yourself. This behavior is dangerous and therefore you feel the emotion of fear. This behavior belongs to _____ theory of emotion.

- A. Cannon-Bard theory

B. James-Lang theory

C. Schachter-Singer theory

D. Lazarus theory

A) Self-actualize

C) Esteem

B) Love

D) Social

2. Intrinsic motivation occurs when _____

- A. Obligations or approval are factors.
- B. There is no obvious external reward for one's behavior.
- C. There are obvious external factors controlling behavior.
- D. Extrinsic motivation is also high.

3. Once Pavlov's dogs learned to salivate to the sound of a tuning fork, the tuning fork was a(n)

- A) unconditioned stimulus
- B) neutral stimulus
- C) conditioned stimulus
- D) unconditioned response

4. During a laboratory experiment, a researcher sounds a ring and the dogs in the laboratory reacted to the sound. However, a particular dog, which is a new comer in the laboratory, did not react.

Based on this information, you can say that the ring is _____ stimulus for the new comer dog.

- A) Neutral
 - B) Unconditioned
 - C) Conditioned
 - D) Generalized
5. Which theory of emotion holds the view that bodily changes PRECEDE emotion and that we experience an emotion AFTER our body reacts?
- A. The common sense theory
 - B. The Cannon-Bard theory
 - C. Attribution theory
 - D. The James-Lange theory

6. What is the correct order of needs in Maslow's hierarchy?

- A. Physiological; esteem; safety; self-actualization; love and belonging
- B. Self-actualization; physiological; safety; love and belonging; esteem
- C. Physiological; safety; love and belonging; esteem; self-actualization
- D. Self-actualization; safety; love and belonging; esteem; physiological

7. When the UCS is removed and the CS is presented alone for a period of time, what will occur?

- A) classical conditioning
- B) generalization
- C) acquisition
- D) extinction

8. Classical conditioning usually works best if which of the following occurs?

- A. The conditioned stimulus (CS) is presented just after the unconditioned stimulus (UCS)
- B. The CS is presented just before the UCS
- C. The CS is presented many hours after the UCS

9. Which of the following help us to recall the content of the specific learning materials in an easy manner? A) Retrieval B) Motivation C) Cue D) Rehearsal

10. Lina has changed his phone number. Now he often finds himself writing his old number when he fills out forms. This is best explained by:

- A) Decay
- B) Retroactive interference
- C) Proactive interference
- D) Cue-dependent forgetting

11. According to the definition of _____, people's behaviour is influenced by its consequences

- A) classical conditioning
- B) observational conditioning
- C) respondent conditioning
- D) operant conditioning

12. Money has been sent to you through the bank, and you silently repeat the secret code until you are called to the counter. This phenomenon is best explained by:

- A) Elaborative rehearsal
- B) Chucking
- C) Memory span
- D) Maintenance rehearsal

13. _____ interference works backwards, and _____ interference works forwards.

Part I: True/False Items (1 Point each)

Direction: Write "True" if the Statement is correct or write "False" if the statement is incorrect and put your answer on the answer sheet provided

1. Punishment decreases the likelihood that a certain consequence will occur.
2. The id is the primitive and acquired part of the mind
3. Social learning theorists believe that thought processes have an important effect on learning
4. Things most recently learned are less likely to be remembered.
5. Repression mean a person is avoiding reality despite what may be obvious to people around them.

Part II: Matching Items (1 Point each)

Direction: Match the descriptions listed under column "A" with the motivational theory listed under column "B" and write the letter of your choice on the answer sheet provided.

<u>A</u>	<u>B</u>
1. Stemming from a disruption in homeostasis 2. Actions are directed toward gaining rewards 3. Motivation rely on your thoughts 4. Focuses on each individual's potential	A. incentive B. drive reduction C. humanistic D. cognitive E. arousal

Part III: Fill in the blank space (1.5pts each).

➤ Identify the UCS, UCR, CS, and CR

Hana's mom followed the same routine before serving dinner – she would put ice in the glasses and then call "come and get it, dinner's ready." Immediately upon hearing those words, Hana would quickly run down the stairs. After a while, Hana would come running down the stairs when she heard the ice hitting the glasses..

1. UCS _____

2. UCR _____

3. CS _____

4. CR _____

Part III: Multiple Choice Items (1 Point each)

Direction: Choose the letter of the correct answer from the given alternatives and Put your answer on the answer sheet provided

1. Bobby's family is throwing him a 75th birthday party. As he prepares the speech he will give at the party, he proudly reflects on the fact that he has reached his full potential by accomplishing all that he can. According to Maslow, on which needs are Bobby reflecting?

studied the history of Middle East two years ago. You now find yourself unable to recall what you learned which is also caused by non-use. This situation can be best explained by—

- A) Interference theory
B) Decay theory
C) Motivated forgetting
D) Cue dependent approach to motivation

- 15) I help an elderly person cross the street because doing a good deed makes me feel good. Which type of motivation is at work here?

- A) Extrinsic
B) Intrinsic
C) primary
D) secondary

- 16) Pavlov is famous for his work in:

- A. contingent conditioning
B. operant conditioning
C. classical conditioning
D. oppositional conditioning

- 17) A punishment which is applied to modify a behaviour:

- A. severe punishments are less effective than mild ones.
B. when punishment is inconsistent the behaviour becomes extinct.
C. consistency is about when punishment follows after the behaviour
D. less intense punishments can be effective if they are applied immediately and consistently.

- 18) If we reinforce the desired response every time it occurs, we are using:

- A. continuous reinforcement
B. incremental reinforcement
C. intermittent reinforcement
D. contingent reinforcement

- 19) Taking away a child's toys after she has hit her brother (to stop her hitting him again!) is an example of:

- A. positive punishment
B. negative punishment
C. vindictive conditioning
D. observational learning

- 20) According to the behavioural learning theory perspective, _____ plays no role in learning:

- A. experience
B. nurture
C. nature
D. punishment

- 21) Giving a student extra work after they misbehave in class is an example of:

- A. positive punishment
B. negative punishment
C. positive reinforcement
D. negative reinforcement

- 22) To train her puppy to roll over, Maji began by rewarding it for simply lying down. The reward continued

- in each step until it finally rolls over. Maji was using:

- A. classical conditioning
B. modelling
C. increases, decreases
D. decreases, increases

- 23) Positive reinforcement _____ the likelihood of a behaviour.

- A. increases, increases
B. decreases, decreases
C. increases, decreases
D. decreases, increases

- 24) Banak got sick after eating a peach. Now he feels sick when he looks at peaches.

- A. spontaneous recovery
B. intermittent reinforcement
C. Modelling
D. generalization

- A) primary, recency C) proactive, retroactive B) recency, primacy D) retroactive, proactive
14. A student who was very anxious about his class presentation forgot about it and missed class on the day of the presentation. Which theory best explains the student's forgetting?
 - A) Decay
 - B) Motivated forgetting
 - C) Interference
 - D) Encoding failure
 15. If Beza has been a good girl and allowed to play her favorite game, her parents are using:
 - A) positive reinforce
 - B) negative punishment
 - C) positive punishment
 - D) negative reinforcement
 16. The first step in learning through observation is:
 - A) retention
 - B) production
 - C) attention
 - D) motivation
 17. Which of the following is not a stage/type in human memory?
 - A) Short term memory
 - B) Long term memory
 - C) Sensory memory
 - D) Episodic memory
 18. After watching his dad wash the car, Yacob tries to mimic him by washing his bike. This is an example of?
 - A) superstitious
 - B) classical conditioning
 - C) observational learning
 - D) positive reinforcement
 19. Our bodies making us thirsty when our water levels are low is an example of _____ theory.
 - A) Instinct
 - B) Incentive
 - C) Arousal
 - D) Drive Reduction
 20. When all of the physiological needs are met, people tend to become concerned with which of the following?
 - A) Love/belonging needs
 - B) Physiological needs
 - C) Self-actualization needs
 - D) Esteem needs
 21. In operant conditioning, what is the tendency for a response to happen only when a particular stimulus is present?
 - A) Stimulus generalization
 - B) Shaping
 - C) Response acquisition
 - D) Stimulus discrimination
 22. Which theory suggests that forgetting is caused by the long passage of time?
 - A) Cue dependency theory
 - B) Decay theory
 - C) Motivation theory
 - D) Interference theory
 23. Which of the following is an example of semantic memory?
 - A) Your high school graduation memories
 - B) Your recollection of the definition of a word
 - C) Your shopping experience at the grocery store
 - D) Your memory of your wedding day
 24. You remember some specific football plays from the first half of last week's game; this is _____.
 - A) Semantic memory
 - B) Procedural memory
 - C) Episodic memory
 - D) Working memory
 25. Students get a grade for a quiz that's given once a week. What is this an example of?
 - A) Fixed-ratio reinforcement schedule
 - B) Variable-ratio reinforcement schedule
 - C) Variable-interval reinforcement schedule
 - D) Fixed-interval reinforcement schedule

PART I: Multiple Choice Items: *Instruction: Read the Following Questions Carefully and Write the Letter of the Best Answer on the Space Provided on the Answer Sheet (1 Point Each).*

1. As psychoanalysis is to unconscious mind, _____ is to covert behavior.
 A. humanistic B. behaviorism C. socio-cultural ☒ D. cognitive
2. As far as the characteristics of learning are concerned, one of the following is NOT true. Learning is:
☒ A. passive B. pervasive C. purposeful D. multifaceted
3. While sensation involves _____, perception involves _____ respectively.
 A. organization, coordination ☒ B. stimulation, interpretation
 B. identification, translation * D. comprehension, information
4. When we recall personal experiences such as who spoke at a party over the weekend or what we did on our last birth day, we are recalling _____ memory.
 A. semantic B. procedural ☒ C. episodic D. non- declarative
5. In psychological research, one advantage of experiments over correlational studies is that experiments generally allow one to study _____.
 A. a large group of people B. cause and effect relationship ☒ C. an individual in depth
 D. changes in people over time
6. Which of the following behaviors can best be described as overt behavior?
 A. Good feeling about oneself B. Good attitude towards others ☒ C. Remembering a past event *
 D. Explaining about a future plan
7. One of the following is NOT true about learning. Learning:
 A. is a change in behavior ☒ B. depends on practice
 C. can be observed directly * D. results in an enduring change
8. Consider what happens as you finish a conversation with a friend and she begins to walk away from you. As you watch her walk down the street, the image on your retina becomes smaller and smaller. Despite the very real change in the retinal image, you do not perceive her as getting smaller. This illustrates _____.
 A. shape constancy B. size constancy ☒ C. location constancy
 D. brightness constancy
9. Which goal of psychology emphasizes on the causes of human behavior?
 A. Prediction B. Description C. Controlling ☒ D. Explanation
10. Your psychology instructor praises the students sometimes after one correct answer, other times after three correct answers and so on. This type of schedule of reinforcement is _____.
☒ A. variable ratio schedule B. fixed ratio schedule
 C. fixed interval schedule D. variable interval schedule
11. According to Richard Atkinson and Richard Shiffrin's model of memory, while a fast-decaying store of visual information is referred to as _____, a fast-decaying store of auditory information is known as _____.
 A. semantic memory, episodic memory ☒ B. echoic memory, iconic memory
 C. episodic memory, semantic memory D. iconic memory, echoic memory
12. An early school of thought in psychology that uses introspection method to discover elementary units of the mind is _____.
 A. functionalism ☒ B. structuralism C. gestalt D. psychoanalysis
13. Assume that after Debela was conditioned to fear a black lion, he also displays fear responses to a black dog. This is a typical example of _____.
 A. stimulus discrimination B. stimulus generalization ☒ C. spontaneous recovery
 D. acquisition (CS → CR)
14. Which of the following sub-fields of psychology is more concerned with diagnosis and treatment of severe mental disorders?
 A. Counseling psychology B. Experimental psychology C. Health psychology ☒ D. Clinical psychology

26. Mr. Tolosa usually locks and unlocks a door 5-10 times before leaving home and even he returns from his way to the workplace to his home to check whether the door was locked properly. This statement best describes

- A. Generalized anxiety disorder
- B. Obsessive-compulsive disorder

27. Assume that Almaz had been watching cooking shows on a television when she was a child. After some years, when asked to make a dish for an event, she exhibited the knowledge. In this scenario,

- C. Post-traumatic stress disorder
- D. Agoraphobia

28. When your psychoanalytic theory of personality with the theories of personality by comparing the note taking is appropriate for you?

- A. Operant conditioning
- B. Classical conditioning
- C. Latent learning
- D. Insight learning

29. A perspective which states that the cause of psychological disorders is mainly arises from problems in information processing and developing self-defeating thoughts which leads to the development of negative emotions and self-destructive behaviors is the

- A. Learning perspective
- B. Cognitive perspective
- C. Outlining method
- D. Cornell method of taking note

30. One of the following statements is NOT true about short term memory?

- A. It has limited capacity and duration
- B. Information stored is readily available for use
- C. It is possible to prolong it for long period of time by rehearsal
- D. It is the direct replica of the information from the environment

31. The decay theory of forgetting asserts that people forget information when the information

- A. has been replaced with newer information
- B. is overloaded with emotions
- C. is deteriorated with the passage of time
- D. has a negative emotional impact

32. According to the psychodynamic theory, people are

- A. Biological creatures driven by fundamental biological needs that produce psychological tensions until the needs are met.
- B. Social creatures driven by sociological needs that produce psychological tensions until the needs are met.
- C. Biological creatures driven by fundamental biological needs that produce physiological tensions until the needs are met.
- D. Social creatures driven by biological needs that produce physiological tensions until the needs are met.

33. The humanistic perspective of personality theory emphasizes

- A. the importance of unconscious processes and the influence of early childhood experience
- B. the description and measurement of specific personality differences among individuals
- C. learning and conscious cognitive processes
- D. self and the fulfillment of a person's unique potential

2. Suppose, you are walking down a dark road late at night. You hear footsteps behind you and begin to tremble, your heart beats faster, and your breathing deepens. You notice these physiological changes, and interpret them as your body's preparation for a fearful situation. You then experience fear. This example belongs to _____ theory of emotion.
- A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory
3. Assume that you have heard one of your favorite music with your girlfriend about two years ago. Currently, whenever you listen such music, you remember her. This is mainly because of _____
- A. classical conditioning
 - B. observational learning
 - C. operant conditioning
 - D. the interference effect
4. Identify correct statement about classical conditioning.
- A. In classical conditioning, two stimuli are associated to each other.
 - B. Once conditioned stimulus is learned, it will never be extinguished.
 - C. There is complete extinction.
 - D. Other similar stimuli to the conditioned stimulus can never generate conditioned response.
5. The similarity between classical conditioning and operant conditioning is that:
- A. Both depend on association of stimulus and response
 - B. Both depend on involuntary behavior (reflex action)
 - C. Both focus on reinforcement and punishment
 - D. Both of them are based on voluntary behavior
6. Any consequence of behavior that discourages responses or behavior by providing unpleasant stimulus is:
- A. positive reinforcement
 - B. positive punishment
 - C. negative Reinforcement
 - D. negative Punishment
7. Assume, you are walking down a dark road late at night. You hear footsteps behind you and begin to tremble, your heart beats faster, and your breathing deepens. Upon noticing this and realize that it comes from the fact that you are walking down a dark road by yourself. This is dangerous and therefore you feel the emotion of fear. This particular example belongs to _____ theory of emotion.
- A. Cannon-Bard theory
 - B. James-Lang theory
 - C. Schachter-Singer theory
 - D. Lazarus theory

f experience states that there is a

urn equally from the real thing and

A" with the most suitable theory
on the answer sheet. Use only

Column B

t and A. Humanistic theory

she is B. Instinct theory

his C. Psychoanalytic theory

mined D. Arousal theory

E. Incentive theory

F. Drive reduction theory

rnatives and write your answer on the

self-actualization?
ibility and autonomy

Part I - True or False Item (0,5 point each)

Read the following statements carefully and write TRUE if the statement is correct and FALSE if it is incorrect only on the answer sheet.

1. Addi-Segment, the cultural center, in the vicinity of Aksum was site of oldest Ethiopian monumental inscription.
2. The Zagwe Dynasty was collapsed due to external and internal factors.
3. The most dominant Muslim merchants in the Northern Ethiopia were known as Ahqala.
4. The main motive of the territorial expansion during the reign of Amde Tsion was purely political.
5. The council of Boru Meda (1878) announced the Tewahido EOC as the only doctrine in the state during the reign of emperor Yohannis IV.
6. Knowledge of history is indispensable to understand who we are and where we fit in the world.
7. The major cause for the shift of Adal's center from Harar to Awasa after the defeat of Imam Ahmed was a growing threat from the Orsamo population.
8. At the time of religious controversies within the Ethiopian Orthodox Church the sect Ye Tsige (Lij) was dominant in Gofjam.
9. During the enforcement of "Close-Door Policy" for about one hundred & fifty years no European entered to the territory of Ethiopia.
10. Emperor Menilik completed the process of the modern Ethiopian Empire building more than any other kings.

Part II. Choice Items

11. Choose the best answer from the given alternatives (0.5 Points Each%)

- Which one is wrong about the Zagwe dynasty?
 - They were known for their construction of caves & rock hewn churches
 - Its cause of collapse was the internal problem of royal succession.
 - The force of Yekuno Amlak killed the last king of Zagwe, Yitbarek & took power
 - The dynasty was established by the then Aksumite rulers of Beja.
 - Its political center was at Adafa.
- What was the major reason that led king Lalibella, to construct rock-hewn churches?
 - to registered them by UNESCO as a world cultural heritage.
 - to show the supremacy of king Lalibella to the world.
 - to establish the second holy land (Jerusalem) in Ethiopia.
 - to construct luxury churches in Ethiopia
 - to exploit the labour of his citizens in constructing the churches.
- Who was the then Aksumite king that allowed the daughter of Prophet Mohammed to stay in Ethiopia & the horn?
 - King Ezana.
 - King Armah Ella Seham
 - King Ella Amida.
 - King Kaleb
 - King Dil Naod.
- Which of the following is not the factor that led to the decline of Aksumite state?
 - Loss of control over the Red Sea trade.
 - Outbreak of insurrection in South Arabia.
 - The beginning of revolt in Agaw territory.
 - The invasion by Beja people.
 - The internal royal succession problem.

6. All of the following was among the medium of exchange in the long distance trade of Ethiopia and the horn during the 19th C, **except**.
- A. Maria Theresa Thalers C. Salt bars (amole)
B. Iron bars D. Abujedi E. Birr
7. The Leche Agreement was signed between
- A. Emperor Yohannes IV and Emperor Tekle Giorgis.
B. Emperor Yohannes IV and Emperor Menelik II.
C. Emperor Menelik II and Emperor Tekle-Giorgis II.
D. Emperor Tewodros and Emperor Yohannis II.
E. Emperor Tewodros I and Emperor Tekle Giorgis.
